Trend of the total number of views

Percentage of total sessions

This depicts the days which has the highest percentage of total session a user has spent in the app/website.

As of September 14 - September 30, Looking at the Visualization, **Sunday** and **Tuesday** has the highest percentage of stayed session over the days. While **Thursdays** are the lowest. A nice insight to be drawn here is to pay close attention to what happened to those Thursdays.

Highest time a user has stayed online.
